Alfa shares insights on SaaS and cloud services

Alfa, provider of Alfa Systems, the cloud-native technology platform at the heart of the world's most progressive asset finance companies, has published a new paper on SaaS and cloud services.

Cloud Services: Finding Success with SaaS discusses the different deployment models available, the factors technology teams should consider when making deployment decisions, and the consequent evolution of cloud deployment models. It goes on to uncover the impact of cloud deployments on the agile delivery of complex enterprise systems transformation projects.

Co-author Chze Ling Wee, a member of Alfa's Solution Architecture team, said: "The agile series guides decision-makers and project leads on how to approach modern enterprise software implementations. SaaS and cloud represent a huge part of that, so we hope the insights we share are useful."

Finding Success with SaaS is the fourth publication in the *Innovation in Implementation* series, in which Alfa's agile experts draw on their talent and experience to discuss ways agile methods can be used to deliver quickly and often. They present the main challenges to consider when operating within a complex systems landscape, with many interdependent factors that aren't easy to separate into manageable chunks.

Previous papers have discussed phased implementations, complex data migrations and systems integration. Read them at alfasystems.com/agile.

Visit alfasystems.com, or find Alfa at all the major industry conferences this autumn.

About Alfa

[Alfa](#) has been delivering systems and consultancy services to the global asset and automotive finance industry since 1990.

Our best practice methodologies and specialised knowledge of asset finance mean that we deliver the largest system implementations and most complex business change projects. With an excellent delivery history over three decades in the industry, Alfa's track record is unrivalled.

[Alfa Systems](#), our class-leading technology platform, is at the heart of some of the world's largest asset finance companies. Key to the business case for each implementation is Alfa Systems' ability to consolidate multiple client systems on a single platform. Alfa Systems supports both retail and corporate business for auto, equipment, wholesale and dealer finance on a multijurisdictional basis, including leases/loans, originations and servicing. An end-to-end solution with integrated workflow and automated processing using business rules, the opportunities that Alfa Systems presents to asset finance companies are clear and compelling.

With over 30 current clients and 26 countries served, Alfa has offices all over Europe, Australasia and the Americas. For more information, visit alfasystems.com or [LinkedIn](#).
